# THE P R E F A C E.

**T**HE Editor of the following Sheets thinks there is little Occasion for Apology, (and therefore will not make any) for giving the Public more accurate Directions for Travelling, than are to be met with in any other Book of the Kind.

JOHN OGILBY and WILLIAM MORGAN were appointed by King *Charles II.* and the Lords of the Council, to survey the Roads of *England*, which they did at the Expence of 7000 l: and accordingly printed the *Britannia* in 100 whole Sheet Maps; several Abstracts and Abridgements whereof have been published: But Length of Time has produced great Alterations by turning the Roads, and the Traveller, by following *Ogilby*, has often been led into the Mire. Many Instances may be found where new Roads are struck out, that were never known, or frequented, till lately; particularly one from *Meriden* to *Chester*, page 44, which is now the usual Coach Road: from *Enston* through *Stratford upon Avon*, to *Birmingham*, page 38; *Peterborough* to *Lincoln*, page 97; and many others not in *Ogilby*, or any other Book of Roads yet published. Another Objection is, that all the Books of Roads hitherto published differ in the Situation of Mile Stones, and, instead of being a Guide to the Traveller, serve only to confound him. *Ogilby*, by taking his Measure from *Cornhill*, made it 12 Miles and a Half to *Hounslow*, but the ten Mile Stone is really on the Heath, a little beyond *Hounslow*; and this Difference was made almost in every Road in *England*.

The Mile Stones are here printed as they are, or ought to be placed on the Road. It were to be wished, that the Commissioners of all the Turnpikes were obliged to continue their Measurement agreeable thereto in a regular Manner from *London*. Instead of which, the Measurement from *Chester* to *Castle-Bromwich* begins at *Chester*, and is continued to *Castle-Bromwich*; the same from *Portsmouth* to *Petersfield*; from *St. John's Bridge* to *Fisfield, Berkshire*; from *Peterborough* to *Lincoln*; and many others. This Regulation, it is hoped, will by and by take place, as well as the Amendment of the Roads, by the total Prohibition of narrow Wheels on Waggon and Carts drawn with more than two Horses, till which time good Roads, cannot be expected at such a Distance from *London*, where the narrow Wheels overpower the broad ones, and spoil what they mend.

'Tis surprising the Farmers should continue so obstinate; and not open their Eyes to Conviction; but so it has been in other Nations besides *England*. It is well known, that the Farmers in *Ireland* used to draw their Ploughs tied to the Horses Tails, and would have continued the same foolish Custom to this Day, had they not been obliged by Act of Parliament to make use of Harnesses. Mr. *Salmon*, in the *Universal Traveller*, Vol. I. Page 573, says that in *Poland* their Ploughs are in Shape like ours, but in many Places are made all of Wood, having no Iron about them: And in the Province of *Samagotia*, when their Lords would have obliged them to fortify their Ploughs with Iron, they chose to lie still and not plough at all, rather than depart from an old Custom.

It may not be at all amiss, in a Book of this Kind, to take Notice of the vast Disproportion between loading heavy Luggage on the fore or hind Wheels of a Carriage, it being plain from Mathematical Experiments, that it will require five Times the Force to

## The P R E F A C E.

v

draw a Carriage out of a Slough, the Weight being on the fore Wheels, as would draw the same, were the same Weight on the hind Wheels. This the Carriers, Coachmen, &c. won't believe, and still continue laying as much of their heavy Luggage as possibly they can in the Boot of their Coach, and on the fore Part of the Waggon; but as this does not affect the Roads, let them persist in their Folly.

The greatest Care has been taken to make this Book as complete as possible without a regular Survey, the Expence whereof, every one will readily suppose, cannot be defrayed out of the Profits of a Book of so small Price as this is. The Method therefore, which the Editor has taken, has been to procure all the Information he could from his Friends, from his own Observations, having travelled thro' most parts of England, and from several of the Post Masters in the Country, who have favoured him with their Assistance. Notwithstanding which, some Mistakes and Inaccuracies will very probably happen. He would think himself greatly obliged to any Gentleman who will favour him with any Additions or Alterations, which may be necessary by making of new Roads, for which many Acts are passed every Session of Parliament. I shall only add,

DIRECTIONS for finding the Road to any Place to which the Traveller wants to go, *viz.* If to *Coventry*, look in the Alphabetical Index for *Coventry*, and opposite to it you are directed to page 34; where you will find the Road to *Coventry*; the rest of the Pages referred to, show the Cross Roads from *Coventry* to *Cambridge*, *Gloucester*, *Hereford*, *Leicester*, *Worcester*, *Droitwich*, *Oxford*, *Banbury*, *Derby*, &c.

If you want to go to a Place not in a high Road, *viz.* to *Aldbrough* in *Yorkshire*, the Alphabet shows, that it is one Mile East  
of

of *Boroughbridge*, the high Road to which from *London* you will find in p. 81.

But as it is impossible to lay down all the Cross Roads, that every Man may have Occasion to go (as a Thousand Men may each have a different Way to travel) therefore a Map is added, that if you do not find in the Book the Road you would go, by finding in the Map the Place you are at, and whither you would go, you will presently see, what Road will bring you thither. For Example, Would you go from *Ipswich* to *York*; you will find by the Map your Road is by *Bury*, *Ely*, and *Peterborough* to *Stamford*, where you are in the high *London* Road to *York*.

In the present Edition of this Book, the Errors of former Editions have been attended to with the utmost Care; a great number of Articles added; particularly, Accounts of Gentlemens Seats remote from the Capital; many of which, exclusive of a great Number of the Routes, are taken from an actual Survey; and the Distance from *London* of every Place in the alphabetical List of Cities, Towns, &c. is given in one View, in every Instance, within half a Mile. So that, if the Distance only is wanted to be known, the Reader need not be at the Trouble of searching for it, in the Routes, or Cross Roads; which, till the last Edition, he was obliged to do, where the Places were not in any of the great Roads; and this Particular, exclusive of many other, renders this Work more conspicuously intelligent and useful, than any Book of the Kind hitherto published.

*Vauxhall, Surrey,*  
1777.

Directions for passing over at *Aust*, and the New Passage between England and Wales, Twenty-five Miles from Bath. See p. 72.

**A**LL Southerly or Westerly Winds are called *Winds below*, and your passing over must be on the Ebb, or going out of the Tide; and you have seven Hours Passage.

All Northerly and Easterly Winds are called *Winds above*, then your Passage must be on the Flood, or coming in of the Tide, and then but five Hours Passage.

When the Wind and Tide go both one Way, there is no passing over.

It is computed, passing *Aust* and the New Passage varies half an Hour; so that when the Tide is coming in, and the *Wind above*, you may pass at the New Passage half an Hour sooner than at *Aust*; but the Tide going out and the *Wind below*, then at *Aust*, half an Hour before the New.

Prices of Goods, Cattle, and Passengers, going over at both Passages.
